

How To Apply for VA Health Care

Required Signature

- There is not a signature requirement for the online registration.
- If you apply in person, by mail or via telephone, you or the person acting as your Power of Attorney must sign and date the form. If your Power of Attorney signs and dates the form you must submit a copy of the Power of Attorney with the form.
- If you sign with an "X," then two people that you know must witness you as you sign the form. They must also sign and print their names on the form.

Application Process

- Once your completed application is received, VA will determine your eligibility for enrollment.
- If approved, you will receive a welcome phone call to assist you with scheduling your first VA health care appointment and to answer questions you may have about your health care benefits.
- VA will send you a personalized Veterans Health Benefits Handbook that contains specific information regarding health care benefits you are eligible for, your Enrollment Priority Group assignment, copay status, and other helpful information as a new enrollee.
- If you are unable to be enrolled or you disagree with the enrollment decision, you may appeal the decision. The handbook will contain information on the appeal process and if you are not able to be enrolled.
